

Olivin 2 cp with
Rain roof cp.

ACCESSORIES OLIVIN

The small tent with big possibilities

We want our Nordic tipis to be as flexible as possible. That is why you can choose to supplement the tent with the different types of inner tents, floor and rain roofs that will best fit your needs.

Accessories

Olivin 2 light with Half inner tent.

Inner tent and Half inner tent

An inner tent with integrated floor is included with Olivin 2 Combi but can be bought as an accessory for any Olivin model. A half inner tent is also available as an accessory. An inner tent offers more reliable protection against insects. It prevents condensation and has a sturdy floor that withstands ground dampness, a common problem in lightweight tents. It has ventilation openings fitted with mosquito nets for improved natural ventilation. An inner tent can also be pitched without the tent, when only insect protection is needed. Note, it is not possible to have a fire or stove in the Olivin inner tents.

Floor

The floor is designed to make it possible to remove or fold away the part nearest the door to avoid having dirty shoes and crumbs on the tent floor. It is made of a carefully chosen standard material of Comfort class. When a microstove or open fire is used in Olivin 2 cp, the floor must be folded away.

Rain roof

With the roof attached to the accessory sleeve, it provides rain protection over the entrance. The rain roof can be put up using one or two hiking sticks (not included).
